Productivity for Growth and Prosperity
INTRODUCTION

Cost and finance play a vital role in translating organisational objectives and plans into desired results and is also one of the most important parameters for evaluation of organisational / departmental performance. Effective utilisation of money has become a very important contributor to the overall success of any organisation / department.

To be successful each manager/executive must be able to evaluate economic impact of his or her decision at each stage. This can be achieved by making cost-estimation, cost-reduction, cost-control, break-even and GST etc. a part of daily working of a manager / executive.

The omnipresent character of money in our organisations demands that all decision makers must be cost conscious and have adequate familiarity with various financial management terms and concepts.
