Office Order

विषय: Regarding removal of unwanted vegetative growth from pucca footpath and central verge and de-concretization of one meter periphery around trees.

It has been observed that tile/concrete has been laid right upto the periphery of the trees and in many cases it is detrimental to the healthy growth and life of the trees. It has also been observed that the weeds growing through the joints of the tiles/concrete or through cracks etc. are not being removed regularly because of which the tiled or concretised area looks very shabby.

All Executive Engineers (Civil) are therefore directed to comply with the following guidelines with immediate effect:

1. While laying tiles or concrete in areas having trees such as road berms/foot paths, building complex etc it shall be ensured that at least one metre all around the trees is left kutcha and filled with good earth.
2. Wherever the tile or concrete has already been laid right up to the periphery of the trees, the portion upto one meter all around the trees shall be de-tiled/de-concretised in a time bound manner.
3. The weeds wherever growing through the joints of the tiles/concrete or through cracks in the pucca areas such as central verge, road berms/foot paths, building complex etc. shall be removed periodically.

यह पत्र प्रमुख अभियंता, लोक निर्माण विभाग की अनुमति से जारी किया जाता है।

उपनिदेशक (अनुवीक्षण)-1
