कार्यालय ज्ञापन

SUB: PROCUREMENT OF RMC FOR PWD WORKS FROM VARIOUS RMC PLANTS.

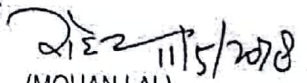

RCC is very important ingredient for any construction whether building or other infrastructure works. Thus, it is of paramount importance to have strict quality control on the concrete used. In Delhi, due to space constraints & low size of projects, RMC is being used extensively. As, RMC is brought from outside source away from site, its quality control requires extensive checks and care.

It is given to understand that CE's / CPM's / PM's have individually approved the list of RMC Vendors and accordingly, these vendors are being specified by them in the tender documents.

However, it has come to notice that many times not all the vendors approved by the Chief Engineers / Project Heads are being specified in the NIT approved by them which is not correct unless there are pressing reasons which should be clearly spelled out.

Further, in order to ensure that RMC brought at site by the agency is from approved source, adequate checks like submission of original bills, manufacturers test certificate for ingredients used etc. should be asked before its acceptance. Department should also test randomly the ingredient materials used at RMC plants from testing laboratory of its choice. Adequate provisions should be made in NIT for these checks to make these binding on agencies. NIT approving authority will personally check these points while according approval.

This issues with the approval of E-in-C, PWD.

(MOHAN LAL)
Superintending Engineer (QAU)
PWD, Delhi.
