Kiran K. Kapila
Chairman

IRF:134:18:KK: 233.

Dear *Shri Agrawal*,

The International Road Federation (IRF) is a non-profit, membership based organization with the mission to promote the development of safer & smarter roads and transport networks that enable access and sustainable mobility for all. IRF has been actively engaged, through its various initiatives, in the global efforts to achieve the objectives of the UN Decade of Action for Road Safety, to which the Government of India stands committed.

In my capacity as Chairman IRF, I have had the pleasure of being in touch with you in the past, and also receiving your unstinting support, regarding our numerous initiatives for taking our mission forward. We are now pleased to inform you that India Chapter of IRF (IRF – IC) is organizing a Seminar on “**Environmental Protection and Safety during Construction**” to be held on **13th – 14th July 2018** at Main Auditorium, India International Centre, Max Mueller Marg, New Delhi.) A brochure is enclosed herewith for kind perusal.

The theme of the Seminar has been selected based on the long felt need in the Highway Construction Industry, both private & public, to generate awareness and a greater sense of responsibility to ensure Environmental Protection and Safety during the construction gestation of roads & highways across the country. With the Government emphasis on accelerated construction of road networks, this need is all the more urgent and must be addressed.

The Public Works Department, which you lead, has a major involvement in Road & Highway development across your state, and hence a vital stake in the aspects of safety during construction of road networks. In view of this eminent stake in the theme of the Seminar, I am writing to request you to nominate several officers of your Department as delegates to attend the Seminar. I would also request you to kindly advise your Contractors and Consultants to send delegates and participate in the deliberations for a meaningful outcome.

The Seminar would have an array of Speakers of repute and be attended by a cross section of the multi-stakeholders of the sector, making for a highly stimulating experience.

Environmental Protection and Safety during Construction

13th-14th July 2018

Main Auditorium
India International Centre
New Delhi, India

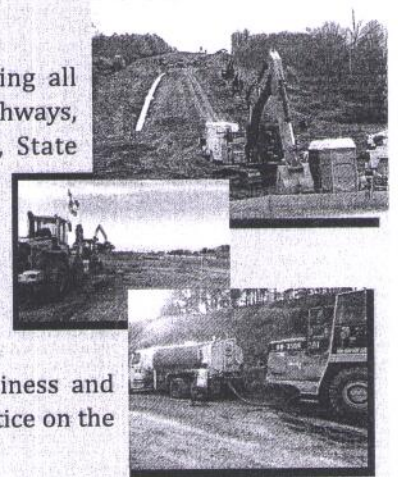

Organised by :
International Road Federation - India Chapter

Seminar on
Environmental Protection and Safety during Construction

13th-14th July 2018

- The Seminar on the theme of Environmental Protection and Safety during Construction is being held in New Delhi on 13th - 14th July 2018. It will take stock of initiatives in this area in the country, over the past few years. This exercise acquires greater urgency in view of the schedule laid down by the 'UN Decade of Action for Road Safety' for halving the number of road accidents, fatalities and injuries in the world by the year 2020. The Decade of Action has been accepted by the Government of India.
- The growth and vibrancy of India's infrastructure programme is what inures India from global recessionary trends. The investment in infrastructure by the end of the 12th Five Year Plan, of which 35% was for the transport and road sector alone, has been estimated at around Rs. 38 lakh crore and has resulted in an impressive build-up of the sector, which is expected to further accelerate in the years ahead.
- The growing road sector demand, the large and diverse road network across the country, both rural and urban, and the fast growth of vehicle ownership, fuelled by economic growth, has implications for the environment and safety during the construction period. This calls for a very systematic mission aimed at making a difference in the existing scenario and ensuring safety.
- The present Seminar will deliberate on different topics related to Environmental Protection and Safety during Construction in the country and examine and make recommendations for The Way Forward. The objective of the Seminar is to facilitate the exchange of information on various aspects of the chosen Theme. Accordingly, the Seminar sub-themes would range over the following subjects:-
 - Design for Safety
 - Environmental Protection of Construction Projects
 - Technology
 - Safety during Construction
 - Safety Issues & Risk
- The Conference would have a wide cross section of delegates representing all major stakeholders of the Road sector: Ministry of Road Transport & Highways, National Highways Authority of India, State Departments of Transport, State Public Works Departments, State Road Corporations, Civil Engineering Contractors, Concessionaires, Consultants, Suppliers, Municipalities, Road Agencies/Authorities, Procurement Managers, Road and Bridge Builders and Maintenance Personnel, Road Building and Road Maintenance Companies, Road Safety Suppliers and Specialists, ITS and Communications Companies, and Environment Experts etc. The diverse participation of so many experts, so intimately connected with road safety issues, would provide excellent business and networking opportunities and a platform to deliberate on state-of-the-art practice on the particular aspects of road safety, covered by the Seminar Theme.

About IRF India Chapter

International Road Federation (IRF) is a not-for-profit global federation of public and private entities promoting road development, with membership across more than eighty countries and six continents.

The India Chapter (IRF-IC) functioning under the aegis of IRF Geneva Program Centre, was registered on 5th February 2009 under the Societies Registration Act XXI of 1860, having aims and objectives that are in consonance with those of its parent body. IRF has been active in India since 2005, and accordingly IRF-IC works for economic, safer and sustainable roads through improved design, construction, maintenance and management. It brings together a formidable body of expertise and experience of its Indian members, from both private and public sectors, engaged in road infrastructure development and related business for furthering the cause of (i) Road Safety (ii) Environment (iii) Road Finance and (iv) Intelligent Transport Systems (ITS).

India's huge road development programme requires road building to be compliant to the highest level of safety and to make the roads forgiving. As it fast tracks its mission of road safety, IRF-IC has garnered support from all related Government and private sector bodies. It works closely with the Ministry of Road Transport & Highways to address the serious concern of road safety in India, which has the highest number of road fatalities in the world.

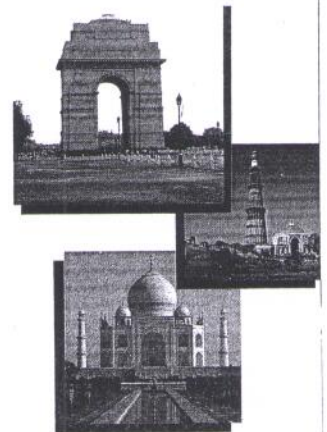

Conference Venue : Main Auditorium, India International Centre, Max Mueller Marg, New Delhi, India.

Conference Sponsorship :

Sponsorship Category	INR (₹)*	Complimentary Facilities
Platinum Sponsor	10,00,000	12 Delegates & Display of Logo

By Bank Draft / Cheque / Bank Transfer

Payment can be made through Bank Draft / Cheque drawn in favour of

'International Road Federation – India Chapter' payable at CA 06061100068179,

IFSC Code PSIB0000606, Punjab & Sind Bank, Rajindra Place, New Delhi.

Programme

Day 1 (Friday, 13th July 2018)

Duration (Hrs.)	Activity / Topic Covered
0830 - 0930	Registration & Networking Tea
0930 - 1030	Inaugural Ceremony Welcome Speech Keynote address by Mr. K.K. Kapila, <i>Chairman IRF</i> Inaugural address by Chief Guest Vote of thanks
1030 - 1100	Networking Tea
	Design for Safety
1100 - 1300	Safety Audit - A Construction Management Approach Guidelines for Considering Construction Safety Requirements in the Design Process Software to Select Design for Safety such as Slope Stability etc. Effects of Globalisation on Safety in Engineering and Construction Projects
1300 - 1400	Lunch
	Environmental Protection of Construction Projects
1400 - 1530	Use of Waste / Untreated / Treated Water in Construction Approaches to Recycling during Construction Calculation of Carbon-dioxide Emissions in Design and Subsequent Implementation during Design and Operation Investigation & Relevant Action in Response to Complaints of Statutory Nuisance under the Environmental Protection Act, 1990 & Clean Neighborhood & Environmental Act, 2005 Minimizing Air/Sand / Noise pollution at Construction Sites Identification and Evaluation of Contaminated Land Sites Implications of Unsatisfactory Drainage Strategies for Minimising Waste during Construction
1530 - 1600	Networking Tea

Technology

1600 - 1800	Developing Construction CAD-Based Safety Experience Management System for Engineers Developing Construction Safety-Based E-Learning Management System Tower Crane Safety Enhancement With Operator Vision Aid Using a Binary Probit Model With Random Effects to Evaluate the Effectiveness of High-Visibility Personal Protective Equipment for Nighttime Highway Operations
-------------	--

Day 2 (Saturday, 14th July 2018)

Duration (Hrs.)	Activity / Topic Covered
	Safety during construction
0930 - 1100	Traffic Management during Construction of Highways Identification and Management of Blind Spots during Construction Signages & Apparel during Construction of Highways Highway Workers Safety - Policies, Practices and Legal Issues
1100 - 1130	Networking Tea
1130 - 1300	Safety Issues & Risk Safety Performance in Developing and Developed Countries Health Safety and Environmental Management Systems - A Case Study Institutional and Economic Challenges to Safety Management within SMEs in Developing Countries Quantification and Communication of Construction Safety Risk Safety for Women & Children at Construction Sites Assessing Safety Risks on Construction Projects Using Analytic Network Process Framework For Change In Safety Culture in India
1300 - 1400	Lunch

Delegate Registration Fee :

IRF Members	₹ 4,000
Non-IRF Members	₹ 5,000

(+ Taxes as applicable)

Registration includes:
One and Half Day-Programme,
Coffee Breaks, 2 Lunches and
Delegate Kit
