CONCRETE 2018

Conference and Exhibition on Cable Supported Structures
(Buildings and Bridges)

13-14 July 2018. Hotel The Royal Plaza, Ashoka Road, New Delhi

Dear Sir,

Greetings form CONCRETE 2018!

It gives me an immense pleasure to mention about the **Conference & Exhibition on "Cable Supported Structures (Buildings and Bridges)"**, a two-day event which is being organized by Indian Concrete Institute, New Delhi Centre (ICI-NDC) and scheduled to be held on 13th & 14th July, 2018 at The Royal Plaza Hotel, New Delhi.

I am thankful to you for accepting the invitation for being the Chief Guest in the valedictory session on 14.07.2018 at Hotel Royal Plaza, Ashoka Road, Delhi.

With Warm Regards,

Shishir Bansal
Chairman
ICI NDC

Dear Sir

Greetings form CONCRETE 2018!

It gives me an immense pleasure to mention about the **Conference & Exhibition on "Cable Supported Structures (Buildings and Bridges)"**, a two-day event which is being organized by Indian Concrete Institute, New Delhi Centre (ICI-NDC) and scheduled to be held on 13th & 14th July, 2018 at The Royal Plaza Hotel, New Delhi.

On behalf of the Organizing Committee, we take this opportunity to invite all the professionals from Construction industry around the world to take part in this Technical event as a Sponsor and Delegates.

Sponsors will enjoy a host of benefits, including wide exposure among conference attendees and full recognition in conference materials. The Organising Committee is making all sincere efforts to provide unique service model to display the culture and image of your company by means of widely brand marketing and exchanges.

I am attaching the Conference Brochure and related forms with this letter, which has all the relevant details.

Kindly go through and let us know if you have any questions and we will be happy to give you further information on the event. You can mail your interest level back.

We look forward to you joining us as a Conference Sponsor and look forward to have a large number of Delegates from your organisation attending the Conference and gain valuable information on the latest technologies.

With Warm Regards,

19/05/18

About Indian Concrete Institute

Indian Concrete Institute (ICI) is a premier professional body for concrete technology with above 12,000 members with 38 centres spread across India. It has on its fold the captains of Construction Industry, Building Material manufacturers, Leading Consultants & Civil Engineers, Contractors, Academicians and Educational Institutions. ICI was founded in 1982 with its headquarter at Chennai. The objectives of ICI are to promote growth of concrete construction and its sub-specialisations, disseminate knowledge and to train personnel, collaborate with national and International agencies in creating better understanding of concrete construction technology, to identify R&D issues, encourage outstanding achievements in concrete construction technology through its institutional awards etc. ICI organises periodical seminars, conferences, workshops and exhibitions on the subject and arranges lecture series on selected topics of relevance to concrete construction. ICI has collaborations with American Concrete Institute, Asian Concrete Federation, Singapore Concrete Institute, Concrete Institute of Australia, etc. ICI publishes quarterly Journal containing peer-reviewed technical papers, technical abstracts from about 40 journals. ICI has also brought out a number of publication and monographs on various related topics

About The Conference

"Necessity is the Mother of Invention". When larger spans were required, an awakening came over 200 years ago to construct Cable Supported Structures. Akashi Kaiyko Suspension Bridge (4km long) is a fantastic example of 1991 m unsupported central span over Akashi strait in Japan.

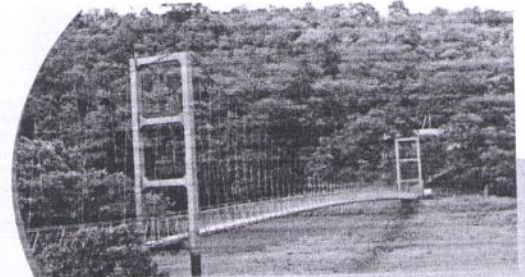

Cable Supported bridges have three major categories, viz Cable stayed bridge, Suspension bridge and Extradosed bridge. First came Suspension bridges, which, by virtue of their structural geometry, can provide larger spans than the other two categories. This type has one pair of main suspension cables and rest auxiliary vertical cables to support the bridge deck. This type is appropriate for large spans up to 2000m. Then came Cable Stayed bridges, wherein taller Pylon is required, and all cables support their share of bridge deck loads. This type is appropriate for spans up to 1200m. Vidyasagar Setu in Kolkata, Naini bridge in Allahabad, Bandra-Worli sea link in Mumbai and Signature bridge in Delhi (under construction) are some of the finest Indian examples of this type. Extradosed bridges incorporate prestressing cables inside concrete as well as outside, which are connected to short Pylons. Such bridges are suitable for spans upto 300m. Nivedita bridge in Kolkata, Barapulla Phase 3 bridge (under construction) in Delhi are some of the finest Indian examples of this type.

Several major buildings such as Indira Gandhi Indoor Stadium in Delhi, have made use of cables to support large span roofs in a very efficient manner.

Being comparatively a new technology, ICI-NDC decided to conduct this event on Cable Support Structures with the following most relevant sub-themes:

Sub-themes

- i) Cable Stayed Bridges
- ii) Extradosed Bridges
- iii) Suspension Bridges
- iv) Cable Supported Pedestrian Bridges
- v) Cable Supported Roofs
- vi) Materials: Quality & Testing
- vii) Foundation: Design & Construction
