Inspection Note

The Chief Engineer, PWD Maintenance Zone M-4 has inspected roads/works under PWD Division M-313/M-311, along with Sh. N.K Bansal, S.E M-31 & Sh.Bishamber Dass, E.E M-313 on 03-06-2014. Following observations have been made:

Delhi University Campus

The Delhi University Campus roads inspected along with Commissioner, Transport and Dr. Tiwari & ACP, Traffic Police

- Dr. Tiwari insisted to remove the divider provided between NMV lane & main carriageway at Khalsa College. But, it was informed by the field staff that the Delhi University Campus was developed during Common Wealth Games 2010. The NMV lane was planned to accommodate cycles & rickshaws etc. in this area. Thus at this stage it may not be possible to merge the NMV lane with main carriageway.
- DU authorities suggested to lower the floor level of all bus stops at least matching with the adjoining footpath as it is difficult to use by differently abled persons. The Commissioner, Transport informed that the bus shelter floor was raised by PWD. It was pointed out by SE/M-31 that the bus shelters were constructed by DTC as per their standard specifications/drawing, thus the matter of lowering of floor level of bus shelters may be dealt by Commissioner, Transport or the authority who constructed the bus shelters.
- E.E M-313 was instructed to follow drawings prepared by the Consultants. EE may also visit Lodhi road area to see arrangements made for NMV lane at intersections.
- At locations, it is observed that the drain covers were placed unevenly after de-silting. These should be placed in proper level.
- At many places, cracks and local depressions are noticed in the road surface. These should be rectified urgently.
- The central verge near intersection is damaged. The damaged portion of kerb stone should be replaced.
- The small ramps as suggested by Dr.Tiwari should be provided at the bus shelters for proper movement/access of wheel chair.
- At places, continuity of tactile breaks due to erection of electric poles or other reasons. It should be connected making loop at such locations.
- The broken trees, branches, tree leaves etc. still not removed from the footpath of university. The Horticulture wing has to be informed to remove these immediately.
- It was observed that old Electric poles have not been removed after upgradation of street lights. These old non functional poles should be removed on priority.

Main road passes through Wazirpur Industrial Area

- The progress of work is slow. As already discussed at site one more slip paver should be brought to take up the concreting work from both ends of roads for early completion.
- About 30metre length of drain is still incomplete. The work was in progress and it should be completed in next 10 days.

Remodelling & desilting of covered S.W. Drain in Jahangirpuri Area

- The work has just started. The opening made in RCC top slab of drain for cleaning of drain should be protected with protection wall around. The work should be completed by end of the month.
