

Inspection Report of Chief Engineer (North), PWD on 01-06-2016

The various roads and progress of desilting works on various drains Hari Nagar Consituency were inspected by the undersigned alongwith Sh. A. K. Sahana, Executive Engineers (West) Road-1, concerned Assistant Engineer, A.D. (Hort.) and others.

1. It could be seen during inspection that in general the maintenance of the roads is in pathetic conditions inspite of the facts that Roads / Horticulture division are incurring huge expenditure in maintenance of roads.
2. Even after the recent tragic i.e. fatal accident of child and cautionary advice and strict instructions were issued by Pr. CE (Maint.) as well as by undersigned many of the drain covers are open. There are large gaps in between concrete slabs placed on the drain. Situation is alarming because these drains are also designed as footpath on top.
3. Not a single stretch of the road is in good condition.
4. Even small things which required little expenditure are not being attended. There are lots of bald surface with malba / garbage are littering on these spaces, which are supposed to be maintained green.
5. Some of the defects notices during inspection are listed on below. This is just to give the idea what our Engineers and maintenance staff are performing even after having a large contingent of engineers, huge team of maintenance staff / labour and number of maintenance vans.
